

Integrated HIV/HTN Consortium Meeting

THE THIRD ANNUAL MEETING

The integrated HIV/HTN annual consortium meeting is a meeting attended by the integrated project's partners, who gather to assess the previous year's activities and prepare for the future year. This meeting contributes to the development of a coherent and structured approach to the anticipated integrated HIV/HTN activities for the next year. This was the third annual consortium meeting, which took place in the first month of the third year at the IDRC Nakasero office. The meeting focused on consortium governance and resolving the primary concerns that consortium members were facing.

IDRC, Makerere University, the Uganda Heart Institute, and the Ministry of Health of Uganda are among the consortium participants of the integrated HIV/HTN project. During the conference, each partner was able to provide an update to the consortium on the actions completed in year 2. "In general, Makerere we have done well. Our budget has been adequate. We adapted by using virtual means for our trainings during COVID. In general, we feel privileged to be part of this consortium meeting. We have achieved a lot and we want to achieve more in the coming year. " On behalf of Makerere University, Professor Moses Kanya stated Members were able to come up with some significant resolutions for year 3 as well as address a few difficulties as they prepared for year 3.
